

## **LiteTouch™ – Swarovski Limited Edition**

Introducing LiteTouch™ limited edition embellished with Swarovski® crystals

Light Instruments Ltd. has officially announced the launch of an exclusive limited edition of LiteTouch™, embellished with Swarovski® crystals. The LiteTouch™ Swarovski Limited Edition was first unveiled during the company's annual Scientific Conference, which took place this year in Alaska, onboard the Celebrity® Infinity cruise.

Light Instruments is in constant pursuit of creating the perfect dental laser experience, for both dentists and patients alike. LiteTouch™ intuitive and appealing industrial design contributes to a welcoming clinic atmosphere. Its design has already impressed the Red Dot jury winning the highly-coveted Red Dot Award for 2016. Now, with our partners at Swarovski, we have designed an elegant, limited-edition, the ultimate expression of the care and expertise that goes into crafting every LiteTouch™ laser we produce.

**LiteTouch™ Limited Edition includes 100% original Swarovski crystals.**

[Congratulations, this is a valid code issued by Swarovski for LiteTouch™](#)

Each LiteTouch™ – Swarovski Limited Edition unit comes with the 'Crystals from Swarovski®' Seal which serves as a certificate of authenticity for products with genuine Swarovski crystals. Each seal has a unique 16-digit code. This code is used as a security tracking mechanism based on unique alphanumeric codes that allow customers to check the authenticity of their embellished unit on the [Swarovski website](#).

## About LiteTouch™

LiteTouch™ is the world's smallest Erbium YAG dental laser for both soft and hard tissue dental treatments. Its unique Laser-in-Handpiece™ technology houses the entire laser mechanism within an impressively small chamber (just 12cm long, with a 2.5cm diameter). This innovative solution mimics the feel of a turbine drill, yet incorporates the laser's unique benefits: micro surgery, faster healing, minimal invasive treatments, and higher patient acceptance.

## About Light Instruments Ltd

Light Instruments Ltd. is an Israel-based company that has made its name as an innovator in the dental laser field, continually raising the bar with its advanced high-end technologies. In 2007, Light Instruments introduced the revolutionary Laser-in-Handpiece™ technology as part of its flagship LiteTouch™ dental laser, the world's most versatile non-fiber Er:YAG laser device for soft and hard tissue dental treatments.
