Er:YAG Laser-in-Handpiece
It is particularly gratifying to write these words at present as the future of dental lasers has never been brighter.

Light Instruments Ltd. is home to the world’s most versatile Er:YAG dental laser device for soft and hard tissue - LiteTouch™.

Our unique laser machine, an Israeli innovation created in the very heart of the start-up nation, is the smallest all-tissue device sold in the dental laser market today. Our revolutionary “Laser-in-Handpiece” technology is unmatched and is changing the way dentists around the world operate.

The development of our new LiteTouch™ model is a significant milestone in the dental laser market. Today we can proudly say that we are standing at the forefront of the dental laser market, with the newest and most exclusive laser device. With a small footprint in the clinic, yet an undeniable global footprint, our new LiteTouch™ device is already an integral device in leading clinics in almost every continent and with our customer-focused approach, we are truly unstoppable.

The key to our success is continues R&D with an ongoing mission to provide dentists around the world with the most-novel laser device and to give them the possibility to offer their patients the best and safest procedures. Thanks to the great passion and hard work of our employees, Light Instruments Ltd. delivers a cutting-edge product with a design like no other.

Our vision is to eliminate the dental phobia patients develop at a young age and to introduce to them a new and different dental experience. One that comes with less pain, healthier treatments and quicker healing time.

This vision comes in the shape of our LiteTouch™.

Eric Ben Mayor
CEO Light Instruments Ltd.
Introducing LiteTouch™ Er: YAG laser, the most versatile dental laser for hard & soft tissue treatments. Thanks to miniaturization of its laser technology, the entire power generator is incorporated within the Laser-in-Handpiece mechanism - a small chamber with direct energy delivery. LiteTouch™ is the smallest device in “all-tissue” lasers category and incorporates unique laser benefits: micro surgery, quicker healing, minimal invasive treatments and higher acceptance of patients to dental treatments.

Equipped with LiteTouch™, dentists can truly perform laser soft tissue and hard tissue procedures with full and free expression of their dental mastery and expertise.
WHY LITE TOUCH™?

- Lite Touch™ revolutionary technology, the "Laser-in-Handpiece", integrates the entire laser mechanism into the handpiece, creating a direct energy delivery system.

- Lite Touch™ includes a "Gentle Treatment" package with sub ablative low energies.

- Lite Touch™ safely decontaminates implant surfaces without changing the implant structure. It is the optimal laser for Peri-implantitis treatments.

- Lite Touch™ is the most ergonomic laser, with almost no limitation of hand movement, allowing easier access to all areas in the oral cavity.

- Lite Touch™ new touchscreen includes a friendly and intuitive user interface, making it simple and easy to use during treatments.

- With Lite Touch™ there is no need for complicated calculations. The software includes an array of adjustable pre-sets for selected procedures.

- Lite Touch™ unique handpiece design, allows easy use, requiring only a very short learning period.

- Lite Touch™ is the smallest Er:YAG dental laser in the industry. It is completely portable and can easily fit into any dental clinic.
**LITETOUCH™ - APPLICATION FIELDS**

**IMPLANTOLOGY**
- Precise & minimally invasive bone ablation.
- Second stage surgery without damaging implants.
- Effective treatment modality for Peri-Implantitis.
- Implant decontamination without any damage to the implant surface.
- Sub-ablative disinfection without injuring healthy bone.
- Increased bone-implant contact rate by encouraging bone growth factors.

**PERIODONTICS**
- Effective pocket debridement & bactericidal effect (disinfection).
- Precise & selective granulation tissue ablation.
- Effective and selective calculus removal.
- Minimally invasive surgery. Fast healing of soft tissue and bone.
- Minimal inflammatory and infectious post-operative complications and discomfort.

**PEDODONTICS**
- The preferred method for treating children: Less fear factor; less noise; no vibrations.
- Precise, gentle and minimally invasive treatments.
